Name of Project *

Address / Location of Project *

Has this project won any other awards? If so, please list them. *

NECA Chapter *

Project Completion Date *

Do you prefer to upload a description of the project, or do you prefer to manually enter it? *

A description of the project must include the work as well as commentary on each of the five criteria as to why this project should win a project excellence award.

Descriptions which do not address each of the five criteria categories will be rejected. If a criteria did not apply to this project, include a comment on why the criteria did not apply

The five criteria categories:

- **Originality** in construction techniques
- **Quality** of workmanship
- **Difficulty** of installation
- **Application** of technology to aid construction
- **Use** of pre-construction or pre-fabrication

You have the option to upload a document with these details or enter it manually. Select your desired option and you will be prompted to upload or enter information, depending on your choice.

PROJECT DESCRIPTION IS REQUIRED FOR JUDGING.

Select one option

- I would like to upload a document entailing description of the project
- I would like to type up the description of the project

Why should this project win a Project Excellence Award?

This optional field allows you to highlight any unique, challenging, or rewarding aspects of the project, explaining why it deserves a PEA.

Electrical Contractor

Sound & Communications Contractor

Supporting Materials

You must submit at least 4 photos of the on-site construction progress and 3 photos that show the completed project.

For best results in showcasing your work, follow these suggested guidelines for your images:

- Your image should be a JPG / JPEG
- Your image should be no smaller than 1,200 pixels (px) by 1,200 pixels (px)
- High resolution images are highly recommended to avoid pixelation or distortion
- Avoid extremely large file sizes, as your image will take longer to load upon viewing
 - Tip: There are free services online which you can use to compress your images' file size without sacrificing quality
